

GK DRUM PILLOW

fits drums with a depth of: 16" -20"
outer material: 100% cotton
padding: damping material
available in two colours

GK DRUM PILLOW brings together professionalism, aesthetics and practicality in one. It offers excellent control of vibrating head, allowing for subtle nuances in sound attenuation, giving a warmer color of sound. It has also an original look.

Designed and made in Poland.

One side of multifunctional GK DRUM PILLOW has eight Velcro that allow to adjust muffler to the individual needs of the drummer. Use them to change not only the shape but also the size of muffler, thus controlling the size of surface area touching the head. The other side of the muffler has additional Velcro, which allow a muffler to be attach to the inner body of a drum. The set also includes two Velcro that could be stuck inside a hoop of a bass drum, allowing muffler to be attach and always be in place.

GK CYMBAL SCULL

Nuts for the cymbal stands in the shape of skulls, replacing the common wingnuts. They have a standard 8mm thread. Available in two metallized colors.

SHAKERS

GK shakers are made of brass. All shakers are characterized by a very pleasant warm sound and also combine well in live music, club, or recording in the studio. Three models - three different sounding shakers.

ROCK

The loudest shaker characterized by "medium-high sound".

length: 16 cm
diameter: 5 cm

POP

This shaker has more delicate sound in relation to the Rock Shake, sonically classified to the high tones, type „High warm tone“.

length: 16 cm
diameter: 4 cm

MINI

This is mini version, which is ideal for faster playing „quick sound“ and perfectly complements on playing our Pop Shake or Rock Shake.

length: 8 cm
diameter: 4 cm

PRODUCT CATALOG

RODS

High quality percussion rods are hand made from bamboo and perfectly balanced to satisfy even the most demanding drummers. What distinguish our percussion rods is special flexible finish of handle, which provides a better grip and protects drumstick against accidental slipping out of the hand during playing. This increases strongly the comfort of playing.

We offer 8 types of percussion rods. Their diversity allows an appropriate choice for everyone, depending on your preference, performed music genre and the desired volume level. Most models have additional reinforced rim shot, which ensures longer life span. For drummers who like to play louder, strongly emphasizing the snare drum with rim shot, we created models with a longer reinforcement of rim shot. In addition, the rods are equipped with rubber bands to adjust the hardness of the tip, so you can adjust the volume of sound.

BEAT

length: 410 mm
drumstick diameter: 12 mm

handle diameter: 17 mm
handle: pcv
weight: 60 g

Lightweight percussion rods, created specifically for drummers who like to play louder and to hit the rim shot heavily accenting when playing acoustic gigs. Resulting in even more accentuated and more distinct snare.

PRACTICE PADS

High quality Polish percussion dual practice pads with or without thread.

A very important advantage of our practice pads is two-sidedness. The use of two different rubbers with appropriately selected parameters of hardness allows you to perform a wide range of exercises hands. Medium-soft rubber (front) reflects well, which gives the best results for practicing fingers and wrists. It is also excellent to improve all the techniques of playing. Hard rubber (rear) is ideal for practicing your wrists, because less reflects, and thus it forces to work harder your wrists.

The advantage of our practice pads is also their weight - only 0.81kg with the diameter of 10" (25cm) and 0.4kg with the diameter of 7" (17,5cm) - which makes they fit into any bag or backpack, and yet one will not feel almost their weight. Good and efficient in practice, not only at home but also in each trip, even faraway one.

GK-DMH10

diameter: 10" / 25 cm
thickness: 2.1 cm
weight: 0.81 kg

Dual practice pad.

GK-DMH10fx

diameter: 10" / 25 cm
thickness: 2.1 cm
weight: 0.81 kg
thread: 8 mm

Dual practice pad with thread.

GK-DMH7

diameter: 7" / 17,5 cm
